Education

JNTU Hyderabad

Bachelor of Engineering

Experience

ADEK Procurement Project

Role: SharePoint Online Developer

Description : Developed a procurement system for the Abu Dhabi Department of Educational

Knowledge (ADEK) using SharePoint Online, Power Apps, and Power Automate.

Responsibilities:

Designed and implemented a SharePoint Online site to manage procurement requests and approvals.

Created custom Power Apps forms for procurement request submission and tracking.

Automated approval workflows using Power Automate, ensuring timely processing and compliance with procurement policies.

Integrated the system with ADEK's existing ERP system for seamless data exchange.

Provided user training and support to ensure effective use of the new procurement system.

DUCAB Intranet

Role: SharePoint Online Developer

Description : Led the development of an intranet portal for Dubai Cable Company (DUCAB) using SharePoint Online.

Responsibilities:

Gathered requirements from various departments and designed an intranet structure to meet organizational needs.

Developed custom web parts, pages, and navigation to create an intuitive and user-friendly intranet.

Implemented Power Automate workflows to streamline internal communications and document management.

Integrated third-party tools and systems with the intranet for enhanced functionality.

Provided ongoing support and maintenance to ensure the intranet remained up-to-date and functional.
